

work breakdown structure

In a nutshell

The WBS is a must for any project and needs to be developed to give the project a "Back Bone". The Work Breakdown Structure feeds into the following 7 of the PMBok's knowledge areas and serves as a powerful cross check.

- Project Management
- Scope Management
- Schedule Management
- Cost Management
- Quality Management
- Risk Management
- Procurement Management.

Are there prerequisites?

There are no mandatory prerequisites for taking this course.

Course outline

The course will explain the following;

- What is a deliverable?
- What is the WBS?
- What is an activity?
- How do we decompose deliverables?
- How costs are derived from the WBS, and the code of accounts that must be inserted into the WBS?
- What cross referencing documents (such as the RACI) come from the WBS?

You will understand how the WBS is constructed, what it is used for and where it fits within Project Management.

What do I get?

- DWDCConnect Facilitator support in the form of guidance, online discussions and coaching session.
- On successful completion of this course, students will receive a DWDCConnect attendance certificate.

Additional Benefits

- Mobile App - access courses in all formats anytime, anywhere through VMEdU's innovative mobile app and enjoys the same learning experience that you get online.
- Progress Tracking - track your progress in any course and chapter online or on mobile app and continue from where you left off.
- Continuous Improvement – in your areas of strength and weakness.
- Collaborate and Learn - team members can discuss with each other and learn collaboratively.
